G-8/4, Islamabad | +92 342 004 2947 | hassan87691@gmail.com | [LinkedIn](#) | [Github](#) | [Portfolio](#)

Objective

Computer Science graduate with hands-on experience in full-stack web development. Seeking a role where I can apply modern JavaScript frameworks, improve system performance, and contribute to building scalable, impactful software products.

Education

Bachelor of Science in Computer Science (BSCS)

NUML University, Islamabad, Pakistan

(2021- 2025)

CGPA: 3.0

Relevant Coursework: Data Structures and Algorithms, Database Management Systems, Web Development

Experience

Full Stack Developer — Digital Matters, Islamabad, Pakistan

September 2025 – Present

- Working on frontend & backend modules for an Islamic books web application using **Next.js**, **Nest.js**, **PostgreSQL** & **Prisma**
- Implementing **REST APIs**, advanced search filters, **JWT-based authentication** and role-based access
- Building **Admin Panel** for content management (books, authors, categories, publishers) with protected routes.
- Developing responsive & optimized UI screens using **Next.js**, React Query and modular component architecture
- Improving backend performance (pagination, indexing, query optimization) to reduce server response times

Full Stack Developer — Digital Matters, Islamabad, Pakistan

6 Weeks

- AI Text Summarizer — React, Node.js, FastAPI, Transformers
- Integrated HuggingFace transformer based summarization model with FastAPI backend
- Developed secure frontend with JWT at scale

Software Developer Intern — Pakistan Post Office, Islamabad, Pakistan

6 Weeks

- Digitalization of Post Office — React, Node.js, Mongoose, Tailwind
- Worked on digitizing branch operations including parcel records & staff screens
- Implemented CRUD apps with authentication & role based access

Web Developer Intern — Elites Digital Marketing,, Islamabad, Pakistan

3 Months

- Developed landing pages & marketing microsites using HTML, CSS, JavaScript
- Learned SEO-based UI improvements and deployment basics

Projects

- **Stitch and Style: Custom Fabric Design Studio (FYP) — React, Node.js, MongoDB, Three.js**
Developed a 3D clothing customization platform with real-time previews. Features include authentication, dynamic fabric selection, designer commission calculation, order placement, and 3D visualization using Three.js.
- **Read Maududi — Next.js, PostgreSQL, Prisma, Node.js**
Built a complete books web app with authentication, book listings, detail pages, user bookmarks, and a full admin panel. Implemented efficient pagination, advanced filters (publisher/date/category), fuzzy search, and optimized DB queries with indexing. Structured backend (Nest.js + PostgreSQL + Prisma) and frontend (Next.js) in a modular, scalable architecture for a responsive and performant user experience.
- **AI Text Summarizer — React, Node.js, FastAPI, Transformers**
Built a full-stack summarization tool that converts long text into concise bullet points. Used FastAPI as the backend layer and integrated both Gemini API and Groq LLM endpoints for generating summaries. Implemented secure authentication on the frontend and connected the React client with the summarization API for real-time response handling.
- **Next Video — Next.js 15, React 19, TypeScript, MongoDB, NextAuth.js, Tailwind CSS, ImageKit**
Built a modern video-sharing platform with user authentication, channel-based video management, secure API endpoints, and optimized video upload handling. Implemented protected routes, session-based access control using NextAuth, and integrated ImageKit for optimized media storage and delivery.
- **MegaBlog — React, Vite, Appwrite, TinyMCE**
Created a modern blogging platform with features like user authentication, rich text editing, image uploads, and post management. Integrated Appwrite for backend services and built a responsive UI with Vite and Tailwind CSS.
- **YouTube Backend Clone — Node.js, Express, MongoDB**
Engineered a backend system replicating core YouTube functionalities, including user registration, video upload and storage, comment threads, like/dislike logic, and user profiles.
- **Next School — Next.js 15, React 19, Tailwind CSS v4, Framer Motion**
Built a modern educational platform using Next.js 15 and React 19 with Tailwind CSS v4 and Framer Motion for smooth UI animations. Implemented a modular component architecture, responsive layouts, dynamic visual effects, and optimized performance using Turbopack and TypeScript.
- **E-commerce App — React, Node.js, MongoDB, Stripe**
Designed and implemented a full-featured e-commerce solution with product catalog, user registration/login, admin product management, cart functionality, and Stripe payment gateway integration.
- **ChatAI — Next.js, Groq, React**
Built a lightweight AI chat app using Next.js 15 + React 19 with Groq API integration, MUI components, Markdown rendering, and syntax highlighting. Deployed on Vercel with optimized using Turbopack.

Skills

- **Programming Languages:** JavaScript, TypeScript, PHP, C++
- **Web/Frameworks:** React.js, Next.js, Node.js, Express.js, Nest.js, Laravel
- **Databases & ORM:** PostgreSQL, MySQL, MongoDB, Prisma, Mongoose
- **Other Technical Skills:** REST APIs, JWT Authentication, Clerk Authentication, NextAuth Pagination & Query Optimization, Admin Panel Development, Fuzzy Search, SSR (Server-Side Rendering), Redux Toolkit, FastAPI Integration with Backend, Stripe Payment Integration
- **Tools:** Git, GitHub, VSCode
